Stellari Hiring Team
Address not provided in job posting

Dear Stellari Hiring Team,

I am writing to express my enthusiastic interest in the Junior Full Stack Developer (Part-time, Student Only) position at Stellari, as advertised in Edmonton, AB. As a Computer Science student at the University of Alberta, anticipated graduation in 2027, and a registered student for Winter 2026, I am eager to apply my skills and passion for full-stack development to contribute to the development of Koru. My experience aligns well with the requirements of this role, and I am confident I can quickly become a valuable asset to your team.

My project, Clubmate AI, demonstrates my ability to build and deploy full-stack applications. I developed an Async Python service bridging an LLM to execute API tools for server automation, implemented Role-Based Access Control using Discord roles, and enforced data reliability using Pydantic. The project reduced club administrative burden by an estimated 80

I am particularly drawn to Stellari's commitment to providing mentorship and a flexible work environment that supports students. I am a responsible, organized, and communicative individual, comfortable working independently in a remote setting. I am eager to learn new tools and technologies and contribute to the early stages of a new software product. The opportunity to gain practical experience in full-stack development, cloud technologies, and agile workflows, while contributing to a real production application, is incredibly appealing.

Thank you for considering my application. I have attached my resume for your review and welcome the opportunity to discuss my qualifications further.

Sincerely,

Chetan Vig
